ACESD 2026 is sponsored by iNehc, IJESD and technically supported by Yokohama National University, National Institute for Environmental Studies, and Japan International Cooperation Agency. ACESD aims to provide a forum for researchers, practitioners, and professionals from the industry, academic and government to discourse on research and development, professional practice in environment and sustainable development.

### PAPER PUBLICATION

Submissions will be reviewed by the conference committees, accepted and presented papers will be published as a volume of [Springer book series: Environmental Science and Engineering](#) which will be submitted for indexing by EI Compendex, Scopus, SCImago and the other major databases.

NOTE: It's acceptable to submit your abstract to us for only oral presentation if you're not expecting any publication of your paper.

## CALL FOR PAPERS

### Environmental dynamics

Meteorology, Hydrology,  
Geophysics,  
Atmospheric physics,  
Physical oceanography.

### Water treatment and reclamation

Habitat reconstruction,  
Biodiversity conservation, Deforestation,  
Wetlands, Landscape degradation and restoration,  
Ground water remediation, Soil decontamination,  
Eco-technology, Bio-engineering.

### Wastewater and sludge treatment

Nutrients removal,  
Suspended and fixed film biological processes,  
Anaerobic treatment, Process modelling,  
Sludge treatment and reuse, Fate of hazardous  
substances, Industrial wastewater treatment,  
Advances in biological,  
physical and chemical processes.

### Global environmental change and ecosystems management

Climate and climatic changes, Global warming,  
Ozone layer depletion, Carbon capture and storage,  
Biofuels, Integrated ecosystems management,  
Satellite applications in the environment.

### Environmental sustainability

Resource management, Life cycle analysis,  
Environmental systems approach,  
Renewable sources of energy-energy savings,  
Clean technologies, Sustainable cities.

### Air pollution and control

Emission sources,  
Atmospheric modelling and numerical prediction,  
Interaction between pollutants,  
Control technologies,  
Air emission trading.
